

indoor air quality and energy saving

TECHNICAL DATA

UTA

VENTILATION UNIT WITH HEAT RECOVERY FOR COMMERCIAL AND INDUSTRIAL BUILDINGS

UTA

Non Residential Ventilation Unit (NRVU) for high air volume.

EQUIPPED

UTA is equipped with high efficiency counterflow heat exchanger (Eurovent certified) and backward blades EC fans.

STRUCTURE

The UTA is composed by three basic modules (two ventilation/filtration modules and a heat recovery/bypass module) which can be easily placed and mounted (fast mechanical and electrical connection). Each module is made of extruded aluminium profiles and double skin zinc magnesium panels, sandwiched on injected polyurethane foam insulation, thickness 45mm. UTA will be delivered with rectangular duct connections. 5 sizes available, all equipped with automatic total bypass. Post heating device (electric or water) and electrical pre heater device are integrated into the unit, while post cooling/heating water coil and direct expansion coil, are available as additional external module. The filtering sections are composed by modules (with standard dimensions) of ePM1 70% (F7) filters for the fresh air flow and ePM10 50% (M5) filters for the extraction air flow. CAV as standard

CONTROLS

UTA is delivered in plug&play configuration. For more informations. For information on this, see the controls technical data.

ACCESSORIES

UTA can be equipped with other accessories such as:

- . recycling module
- . silencer module
- . pre-filters and pocket filters
- . Umidity probe, CO₂ or CO₂ / VOC
- . constant pressure operation kit
- . protection roof for outside instalazione
- . grilles and damper

For a more complete view of the characteristics of the control panels, please read the specific manuals.

UTA STANDARD configuration

UTA MIRRORED configuration

Counterflow heat exchanger made of aluminum manufactured by RECUTECH
RECUTECH participates in the Eurovent Certification Program

PERFORMANCE (UNI EN 13141-7)

The unit must be ducted properly: UTEK authorizes the use only according to its performance diagram shown into this catalogue
The declared performances are with CLEAN filters M5/F7, and guaranteed ONLY with the original filters UTEK low pressure drop.

UTA 1

UTA 1+

PERFORMANCE (UNI EN 13141-7)

The unit must be ducted properly: UTEK authorizes the use only according to its performance diagram shown into this catalogue
The declared performances are with CLEAN filters M5/F7, and guaranteed ONLY with the original filters UTEK low pressure drop.

UTA 2

UTA 3

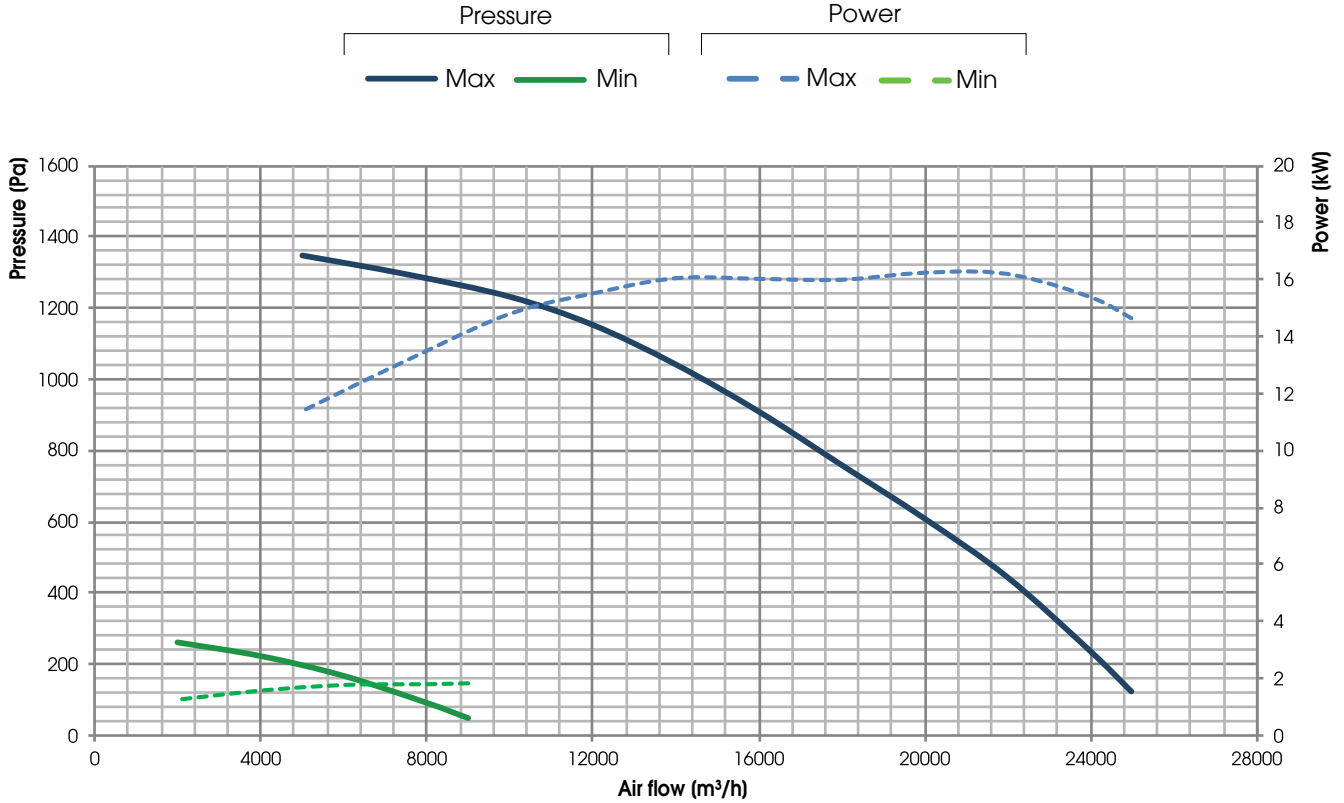

PERFORMANCE (UNI EN 13141-7)

The unit must be ducted properly: UTEK authorizes the use only according to its performance diagram shown into this catalogue
The declared performances are with CLEAN filters M5/F7, and guaranteed ONLY with the original filters UTEK low pressure drop.

UTA 4

HEAT RECOVERY PERFORMANCE (sensible efficiency)

Values referred to the following conditions (UNI EN 308:1998): T_{bs} external air 5°C; U.R. external 72%; T_{bs} environment 25°C; U.R. environment 38%

DIMENSIONS (mm) & WEIGHTS (kg) UTA for SHIPPING and POSITIONING

For shipping and positioning reasons, UTA is supplied in 3 modules designed for quick connections (mechanical and electrical) on site.
The presence of H2O cold / hot coil, silencers septa, or empty modules (e.g. humidifier positioning) involves additional modules

RECIRCULATION MODULE

Made with 45 mm insulated panels, like the recuperator; equipped with 3 motorized dampers : one on expulsion air, one on renewal, the third puts in communication air of recovery and input.

It uses the energy content (temperature) of the air in the room and re-enters it, decreasing the load of the primary heating / cooling system. When the fan motors are stopped, the dampers on expulsion and renewal close the vents to prevent hot air outflows

Modulating damper motors (0-10 Volt signal) can be operated by an air quality probe positioned on the return duct (average of the values of the different environments) or inside a "master" room. As the CO₂ concentration in the rooms rises, the amount of external air will be increased, because two dampers open (plus external air) and one closes (less recirculation), with the aim of lowering the CO₂ bringing it back to optimal values.

Alternatively, temperature or other external signal management (0-10 Volt signal required)

CLOSED RECIRCULATION MODULE

OPEN RECIRCULATION MODULE

UTA FLOOR INSTALLATION

 Minimum required space for maintenance (mm)

NOTE: for outdoor installation, provide a roof (see price list)

FILTERS OPTIONS

NOTE: for the use of bag filters and pre-filters, contact the Technical Department for the pressure drop values

A	Manufacturer's name	C.L.A. S.r.l.				
B	Manufacturer's model identifier	UTA 1 BP CAV	UTA 1 + BP CAV	UTA 2 BP CAV	UTA 3 BP CAV	UTA 4 BP CAV
C	Declared typology	UVNR / UVB	UVNR / UVB	UVNR / UVB	UVNR / UVB	UVNR / UVB
D	Type of drive installed	Variable speed	Variable speed	Variable speed	Variable speed	Variable speed
E	Type of HRS	other	other	other	other	other
F	Thermal efficiency of heat recovery (%)	82,8	82,4	82,7	83,0	82,6
G	Nominal NRVU flow rate (m³/s)	2,22	3,13	3,38	4,3	5,9
H	Effective electric power input (kW)	5,15	6,69	10,36	12,0	16,4
I	SFPint (W/(m³/s)	1040	1032	1085	1044	1077
J	Face velocity at design flow rate (m/s)	2,14	2,00	2,16	2,07	2,21
K	Nominal external pressure (Pa)	200	200	500	550	500
L	Internal pressure drop of ventilation components (Pa)	694	670	704	748	771
M	Optional: internal pressure drop of non-ventilation components	-	-	-	-	-
N	Static efficiency of fans used in accordance with Regulation (EU) No 327/2011 (%)	62,8	65,8	68,5	69,0	68,7
O	Declared maximum external leakage rate of the casing of ventilation units (%)	1,9	2,2	2,0	2,3	2,1
O	Declared maximum internal leakage rate of bidirectional ventilation units or carry over (for regenerative heat exchangers only) (%)	3,4	3,4	3,1	3,5	3,4
P	Energy performance, preferably energy classification, of the filters (declared information about the calculated annual energy consumption	ePM1 70% (F7)/ ePM10 50% (M5)	ePM1 70% (F7)/ ePM10 50% (M5)	ePM1 70% (F7)/ ePM10 50% (M5)	ePM1 70% (F7)/ ePM10 50% (M5)	ePM1 70% (F7)/ ePM10 50% (M5)
Q	Position and description of visual filter warning for RVUs intended for use with filters, including text pointing out the importance of regular filter changes for performance and energy efficiency of the unit	Filter warning is signaled on the display of the control system: the flashing writing "DirtyFilters" will appear. "To preserve the energy efficiency of the NRVU, it's recommended to replace the filters when signaled." Positioned near the filters inspection				
R	Casing sound power level (LWA) (dB)	79	78	85	77	85
S	Internet address for pre-/dis-assembly instructions	www.utek-air.it				

CLA & UTEK reserves the right to at any time the necessary changes to improve products without prior notice .

Dear Customer
Thanks for your attention to the product UTEK,
designed and manufactured to ensure the real
values to the User : Quality, Safety and Savings on
working.

Made in Italy

**AZIENDA CON SISTEMA
