

TECHNICAL DATA SHEET

UNIT	ENERGETIC CLASS
AURA 1 & 2	A

AURA PRO

VENTILATION UNIT WITH HEAT RECOVERY FOR RESIDENTIAL BUILDINGS

AURA PRO

It is a Decentralized Mechanical Ventilation Unit with heat recovery that does not require the installation of an air distribution system with ducts and diffusers. The unit uses a regenerative heat exchanger (ceramic exchanger). Two sizes are available:

AURA PRO 1 with a nominal airflow of MAX 24 m³/h

AURA PRO 2 with a nominal airflow of MAX 50 m³/h

AURA PRO

- Power supply: 230 V - 1 phase - 50 Hz (onboard)
- Standard remote control

FAN function

- Speed settings: MAX / INTERMEDIATE / MIN / OFF
- CYCLE function (independent of speed)
- Manual mode:
 - IN = air intake
 - OUT = air extraction
- Automatic mode: AUTO

Additional features

- External temperature sensor to prevent intake of excessively cold air T and RH check every 12 hours to optimize cycle duration (35 ÷ 200 sec.) and ensure maximum efficiency
- Humidity/VOC sensor: switches to MAX speed based on humidity or VOC detection
- Light sensor: switches to MIN speed when the light is turned off
- Night mode (SLEEP): operates at minimum airflow for maintenance (e.g., during prolonged absence)
- Configurable airflow direction

- COMPLETE

All AURA PRO units come with all necessary components for operation and are ready to use.

- SIMPLIFIED INSTALLATION

The mounting kit includes all components, making installation quick and easy in both new and existing buildings.

- VENTILATION

Brushless axial fan with Erp-2015 electronic motor. High efficiency and low noise levels.

- FILTRATION

Coarse 45% filter (formerly G3) with low pressure drop, easily removable for maintenance from the front side of the unit.

- STRUCTURE

Antistatic ABS plastics with UV protection.

- HEAT EXCHANGER

Regenerative alternating flow heat exchanger. Made of ceramic, ensuring high heat exchange efficiency and low pressure losses.

- FOLDABLE EXTERNAL GRILLE (standard)

Standard: Foldable Ø 190 mm external grille, easy to install from the interior (no need for an external structure).

Optional: Design external grille with improved weather resistance, installable from the exterior.

AURA PRO 1

SENSIBLE HEAT RECOVERY EFFICIENCY

Values refer to the following conditions (UNI EN 13141-7): T_{bs} outdoor air 7°C; RH outdoor 72%; T_{bs} indoor 20°C; RH indoor 28%.

N.B. - Efficiency values of the airflow 'in the cycle,' meaning they take into account the fan stop time for reversing the airflow direction."

Speed (nr.)	1	2	3
Air flow (m ³ /h)	6	9	18
Efficiency (%)	85,5	83,4	79

AURA PRO 2

SENSIBLE HEAT RECOVERY EFFICIENCY

Values refer to the following conditions (UNI EN 13141-7): T_{bs} outdoor air 7°C; RH outdoor 72%; T_{bs} indoor 20°C; RH indoor 28%.

N.B. - Efficiency values of the airflow 'in the cycle,' meaning they take into account the fan stop time for reversing the airflow direction."

Speed (nr.)	1	2	3
Air flow(m ³ /h)	12	20	38
Efficiency (%)	85,5	82	77

Weight 3,8 kg

AURA PRO installations with longer pipe length

If necessary, a longer pipe (same diameter) can be used compared to the standard (max. 540 mm); this results in a reduction in performance: the air circuit will have higher pressure losses, and the fan will operate at a lower flow rate to compensate for them.

Regarding the AURA PRO 2 size (nominal flow rate 50 m³/h), the graph shows the reduction in flow rate (y-axis) as the length of the duct increases (extension from 0.5 to 4 meters, x-axis); the test was conducted with ducting WITHOUT bends, meaning without localized pressure losses.

m ³ /h	mt
13,90	4,0
24,16	3,0
35,60	2,0
50,86	0,5

"NOTE: an application with an extension over 4 meters is not recommended.

The RED curve refers to the STANDARD machine; the BLUE curve refers to a unit with ENHANCED PERFORMANCE that we can provide in case of a minimum batch (about 20 units, with delivery NOT from stock).

ACCESSORIES AND SPARE PARTS

Spare ceramic regenerator

WALL MOUNTING TEMPLATE

Template for wall mounting of the unit with quick disassembly. The template can be useful in situations where, for unit inspection, it is preferable not to remove the wall mounting screws but to disassemble the unit using convenient fastening knobs. It is supplied as a kit with mounting screws and accessories.

AESTHETIC EXTERNAL GRILLE

Finishing grille made of white plastic. Rear insulation for anti-condensation function.

PLASTIC PARTS KIT

Complete kit of plastic parts for replacement.

G3 REPLACEMENT FILTER

Replacement filter in G3 class.

ANGLE EXIT KIT

It is possible to install the unit with an angular airflow direction and exit close to the window frame (e.g., the reveal between the window and the external wall); the exhaust grille is concealed.

The kit consists of:

Round/rectangular connector + 1-meter length tube

End connector with aluminum grille

(rain deflector blades and protective mesh)

Available for AURA PRO 1 and AURA PRO 2, analog and electronic versions; a dedicated technical datasheet is available upon request.

UNIT PREPARATION KIT - PVC version - Insulated version

During construction, it is possible to position the preparation kit (PVC pipe or insulated) and complete the AURA PRO unit supply (full unit) at a later stage.

Complete with closure accessory.

Note: for the small size, it is necessary to insert the additional insulation between the PVC (AURA PRO 1) and the PPE pipe.

3IBM0E000ADL: PVC pipe L = 500 mm - AURA PRO 1 - Preparation (OUTSIDE diameter 105 mm)

3IBM0E100ADL: Insulated pipe L = 500 mm - AURA PRO 1 - Preparation (OUTSIDE diameter 155 mm)

3IAM0E000ADL: PVC pipe L = 500 mm - AURA PRO 2 - Preparation (OUTSIDE diameter 165 mm)

CADCONPPE036: Insulated pipe L = 1000 mm - AURA PRO 2 - Preparation (OUTSIDE diameter 190 mm)

"COVER FINISHES

The front panels are available in various versions (metal, wood, painted or paintable) to customize the AURA PRO heat recovery unit and integrate it into different living environments. The front panels are supplied complete with mounting screws for easy and intuitive replacement of the standard front panel. Front dimension 230x230 mm.
