

indoor air quality and energy saving

TECHNICAL DATA

CRHE-V

VENTILATION UNIT WITH HEAT RECOVERY FOR COMMERCIAL AND INDUSTRIAL BUILDINGS

CRHE-V

Non-residential ventilator unit with dual flow and high yield heat recovery. **All sizes are available also in the version with ENTHALPY EXCHANGER**

PERFORMANCE

Equipped with counter current heat exchanger in aluminium (Eurovent certified) and electronic backward blade ventilators. The total bypass as standard allows favourable climatic conditions to be taken advantage of outside the building for free cooling (or free heating) in automatic mode.

STRUCTURE

CRHE-V is manufactured using a profiled extruded aluminium frame and 36 mm thick sandwich panels, insulated in polyurethane foam. The panels and inner parts are manufactured in magnesium zinc, material that ensures high strength against corrosion and oxidation. A panel with shutter opening eases access to the filters (ePM1 70% (F7) for the renewed air flow and ePM10 50% (M5) for the extraction air flow). CRHE-V is prepared for installation outdoors (with an optional, specific protective roof) and indoors; it is supplied with 100 mm high aluminium bases for installation on the floor. Available in 6 sizes, it can be equipped with air post-treatment systems (inside the unit) such as: hot/cold water battery, electrical heater or direct expansion battery. CRHE-V was designed to enable easy configuration of the connection to the air distribution/captation ducts. It is also possible and easy to install post-air treatment devices after sale. The pre-heater is inside, between the filter and the heat exchanger.

CONTROLLI

CRHE-V was supplied with an electric box and control system; it is available in a version equipped with EVO-PH control and a version equipped with EVOD-PH-IP control prepared for complete integration in home automation systems (Modbus protocol with Ethernet connection or, on request, with the addition of connection RS485). The new version of our control systems enables extremely easy and rapid passage from a control system to another, even after installation with the single replacement of the remote panel.

The EVO-PH control has a coloured, backlit touch screen interface with intuitive viewing of the working status of the machine. It enables precise adjustment of ventilator speed and has a weekly, time schedule for automatic management of the ventilators. It can be controlled by an external switch to activate the booster function, it can automatically adjust the air flow rate if connected to an air quality probe, it can manage any air post treatment accessories, it automatically manages the bypass and prevents heat exchanger freezing by managing the speed of the ventilators or, if installed, an electrical pre-heating resistor (optional accessory outside the machine); it signals to the user the need to replace the filters (the clogging status of the filters is monitored by a pair of different pressure switches, supplied as standard) or an anomaly, indicating the origin. With the addition of optional accessories (COP kit and CAV kit installed on the channel) you can manage the ventilation machine in constant pressure or constant flow rate mode.

The EVOD-PH-IP control has the same characteristics as the EVO-PH version with the addition of Modbus communication protocol which allows full control of the machine by the supervision software of the home automation system. The implemented webserver allows interaction with the machine, even with an internet browser of a device connected (even from remote) to the home automation system in which the machine is inserted.

ACCESSORIES

- CRHE-V can be equipped with other accessories such as:
 - . R.H. of probe, CO₂ or CO₂ / VOC
 - . Operating kit pressure or constant flow
 - . protection roof for outside instalazione
 - . grilles and damper

For a more complete view of the characteristics of the control panels, please read the specific manuals

D	Type of drive installed		Variable speed drive	Variable speed drive	Variable speed drive	Variable speed drive			
E	Type of HRS		other	other	other	other			
F	Thermal efficiency of heat recovery [%]		82,2	82,2	82,7	84,6			
G	Nominal NRUV flow rate [m³/s]		0,161	0,254	0,47	0,597			
H	Effective electric power input [kW]		0,29	0,33	0,95	0,82			
I	SFPint [W]/[m³/s]		842	461	1103	569			
J	Face velocity at design flow rate [m/s]		1,2	1,3	1,5	1,5			
K	Nominal external pressure [Pa]		200	200	200	200			
L	Internal pressure drop of ventilation components [Pa]		475	278	697	344			
M	Optional: internal pressure drop of non-ventilation components		-	-	-	-			
N	Static efficiency of fans used in accordance with Regulation (EU) No 327/2011 [%]		56,5	58,5	63,2	55,4			
O	Declared maximum external leakage rate of the casing of ventilation units [%]		5,4	4,6	2,9	4,0			
O	Declared maximum internal leakage rate of bidirectional ventilation units or carry over (for regenerative heat exchangers only) [%]		9,5	7,1	4,5	4,6			
P	Energy performance, preferably energy classification, of the filters (declared information about the calculated annual energy consumption)		ePM1 55% (F7) ePM10 50% (M5)	ePM1 55% (F7) ePM10 50% (M5)	ePM1 55% (F7) ePM10 50% (M5)	ePM1 55% (F7) ePM10 50% (M5)			
Q	Position and description of visual filter warning for RVUs intended for use with filters, including text pointing out the importance of regular filter changes for performance and energy efficiency of the unit		Filter warning is signaled on the display of the control system: the flashing writing "DirtyFilters" will appear. "To preserve the energy efficiency of the NRUV, it's recommended to replace the filters when signaled." Positioned near the filters inspection						
R	Casing sound power level (LWA) [dB]		52	51	59	60			
S	Internet address for pre-/dis-assembly instructions		www.utek-air.it						

A	Manufacturer's name	C.L.A. S.r.l.	CRHE 3200EC BP EVO-PH SV	CRHE 4500EC BP EVO-PH SV	CRHE 5600EC BP EVO-PH SV
B	Manufacturer's model identifier		UVNR / UVB	UVNR / UVB	UVNR / UVB
C	Declared typology		Variable speed drive	Velocità variabile	Velocità variabile
D	Type of drive installed		other	altro	altro
E	Type of HRS		85,0	83,0	85,6
F	Thermal efficiency of heat recovery [%]		0,825	1,110	1,453
G	Nominal NRVU flow rate [m³/s]		1,47	3,33	2,88
H	Effective electric power input [kW]		695	1199	781
I	SFPint [W]/[m³/s]		1,5	2,0	1,8
J	Face velocity at design flow rate [m/s]		200	500	250
K	Nominal external pressure [Pa]		299	744	370
L	Internal pressure drop of ventilation components [Pa]		-	-	-
M	Optional: internal pressure drop of non-ventilation components				
N	Static efficiency of fans used in accordance with Regulation (EU) No 327/2011 [%]		48,3	63,7	54,0
	Declared maximum external leakage rate of the casing of ventilation units [%]		4,2	3,7	3,0
O	Declared maximum internal leakage rate of bidirectional ventilation units or carry over (for regenerative heat exchangers only) [%]		3,5	2,8	2,3
P	Energy performance, preferably energy classification, of the filters (declared information about the calculated annual energy consumption)		ePM1 55% (F7) ePM10 50% (M5)	ePM1 55% (F7) ePM10 50% (M5)	ePM1 55% (F7) ePM10 50% (M5)

CLA & UTEK reserves the right to at any time the necessary changes to improve products without prior notice .

Dear Customer

Thanks for your attention to the product UTEK , designed and manufactured to ensure the real values to the User : Quality, Safety and Savings on working.

Made in Italy

**AZIENDA CON SISTEMA
DI GESTIONE QUALITÀ
CERTIFICATO DA DNV GL
ISO 9001**
